

TYPED CLIENT / RUNTIME-AUTHORITATIVE CLI

C# meets print systems.

Discover the installed contract, render through argument-safe process APIs, inspect the result, and retain structured evidence.

Program.cs

```
var client = new FullBleedCliClient();  
var result = await client.RenderAsync(  
    new FullBleedCliRenderRequest  
    {  
        HtmlPath = "report.html",  
        CssPath = "report.css",  
        OutputPath = "report.pdf"  
    });  
  
result.EnsureSuccess();
```

01

Discover

Capabilities, agent contract, and command schema.

02

Render

Typed options without shell interpolation.

03

Prove

PDF inspection, preview, hash, and deterministic rerun.
